

## Facts You Should Know

Every three minutes in the US, a person is diagnosed with breast cancer.

80% of all women with breast cancer have NO family history of the disease.

Early detection saves lives. There is a 95% survival rate when breast cancer is detected early.

Men can be diagnosed with breast cancer.

Studies have found that breast cancer patients who receive support and intervention services have improved chances of survival.

Women can be diagnosed with breast cancer during pregnancy.

Women Supporting Women reminds you to perform a monthly breast self exam (BSE) and schedule regular clinical breast exams and annual mammograms.

*Breast cancer touches all of us...*

*We are here for you.*

## Our Mission

To provide awareness, education and support to all those who are affected by breast cancer.

## About Us

Women Supporting Women is a regional non-profit organization which was founded by three local women who started the group out of their homes.

We are dedicated to continuing their mission of providing guidance, understanding and encouragement.
